

2004-2008 Ford Econoline (Ambulance)

This guide will show the proper way to install a Dual-Vision XC4 Camera in a 2004-2008 Ford Econoline. Please review the Service Bulletins for grounding and making connections prior to installing. In this guide you will find dash removal, wire locations, & mounting locations.

THIS GUIDE WILL WORK WITH DIESEL & STANDARD VEHICLES

After testing and verifying power wires, disconnect the negative battery terminal to prevent any accidental shorts or blown fuses

Verify no vehicle service lights are on prior to installation. Contact a Fleet Manager immediately if the vehicle has any damage

UPDATED October 15th, 2018

*****NEW PART*****

*****Harness DV457 is needed if trigger wires are being connected*****

Gray – Installation Warning

Red – Urgent Warning

Blue – Extra Installation Parts Needed

Purple – New Installation

2004-2008 Ford Econoline (Ambulance)

IMPORTANT: Windshield Mounting should only be performed when windshield temperature is within 50°F-100°F (10°C-38°C) to allow proper curing of adhesive.

Run the defrost on high heat or use a heat gun in colder temperatures

This assumes you have already performed one temporary install to determine proper Recorder location

Before starting your install, Clean the windshield with 70% Isopropyl Alcohol & allow time to dry

Giving the VHB tape time to cure before mounting the Recorder will give you a permanent bond and prevent recorders from falling off the windshield

Do not use any other cleaning product on the windshield!

Commercial glass cleaners contain surfactants & denatured alcohol which can reduce the effectiveness of the adhesive

- A- Apply Primer to the mounting location on the windshield. It will leave a film when dry.**
- B- Apply Primer to the bracket. Leave the bracket on the dash away from contaminants.**
- C- After the primer is dry and the windshield is the correct temperature, apply the VHB tape marked PERMANENT by ROLLING the tape onto the glass to avoid air bubbles.**
- D- VERY IMPORTANT - Push firmly around all edges of the VHB tape. Apply pressure for 30 seconds**

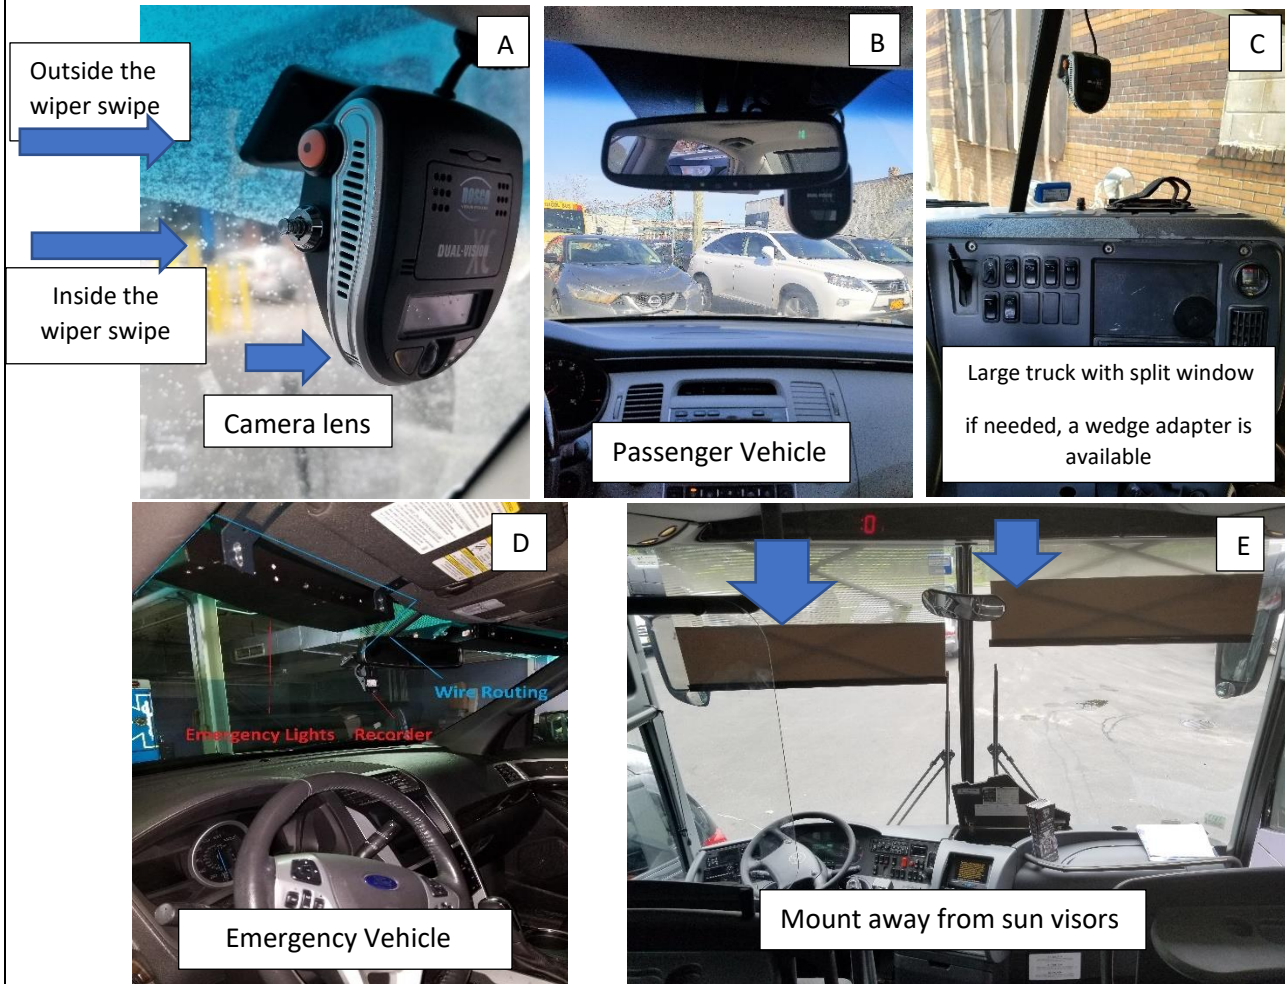

Proceed to the next page for Step 1 of the installation. Apply the bracket to the windshield during the last step of the install

2004-2008 Ford Econoline (Ambulance)

Mount the bracket in a location that allows the lens to be inside the wiper swipe line (Photo A)

For passenger vehicles, mount the Recorder behind the rear-view mirror towards the passenger side (Photo B).

For larger trucks or buses, mount the Recorder as shown (Photo C) and make sure the lens is **INSIDE** the wiper swipe.

When working on emergency vehicles use extreme caution when routing wires around emergency lights and equipment (Photo D)

Always pull down the vehicle sun visors to make sure they don't block or interfere with the Recorder or the video (Photo E).

Step 1 - Dash Removal:

- Starting from the top, pry the lower dash panel and pull down to remove

2004-2008 Ford Econoline (Ambulance)

Dash Removal Continued:

- Remove the Three 8MM bolts on both sides of the metal support brace (6 Total)
- This will give you access to power connections & mounting location.

2004-2008 Ford Econoline (Ambulance)

Step 2 - Power connections:

- Locate the gray ignition plug located on the steering column
- Connect the RED **Constant** Wire to the vehicles **Light Green/Violet** wire
- Connect the YELLOW **Ignition** wire to the vehicles **Pink/Light Green** wire

2004-2008 Ford Econoline (Ambulance)

Step 3 - Antenna Mounting:

It's important to mount the antenna on the windshield, with a clear view of the sky
Mount the antenna on the same side of the vehicle as the PDC

Front of Antenna (Flat part needs a clear view of the sky). Bottom of Antenna (Curved part) facing inside the vehicle

Notice the angled part of the antenna is facing down (Photo A & B). Make sure the FLAT SIDE of the antenna has a CLEAR VIEW OF THE SKY and is facing OUTSIDE (Photo C)

After all connections are made, coil up all the extra antenna cable (Photo A)

Never bend the cable. This will cause signal loss and damage to the antenna (Photo B)

Please refer to the Antenna Installation Guideline for complete details

Step 4 - PDC & Modem Connections:

- Connect the USB cable from the modem to the PDC and secure with a zip tie (Photo A)
- Connect the Antenna cable to the modem (Photo B)
- Make these connections prior to mounting the modem & PDC
- Make sure the screw on the modem cover is secured and doesn't move or bend (Photo C)

Connect the MIMO 1 antenna wire to the Modems PRI connector

Connect the MIMO 2 antenna wire to the Modems DIV connector

2004-2008 Ford Econoline (Ambulance)

Step 5 - PDC & Modem Mounting Location:

- The Modem can be attached to the factory harness on the left side of the cavity behind the dash
- Secure the modem with a zip tie

2004-2008 Ford Econoline (Ambulance)

PDC & Modem Mounting Location Continued:

- Mount the PDC in the center consol. You can access this from the right side of the lower dash.
- Secure a zip tie around the hole in the dash to prevent the PDC from falling.
- Even with the zip tie in the hole, the dash will still assemble properly without damaging the zip tie

IT'S IMPORTANT TO NEATLY ZIP TIE WIRES TO A FACTORY BRACKET OR HARNESS TO PREVENT FROM FALLING. KEEP AWAY FROM THE STEERING FUNCTIONS AND ANY MOVING PARTS

**PLEASE READ THE RECORDER MOUNTING & VHB TAPE INSTALLATION GUIDELINE BEFORE
PROCEEDING TO THE NEXT STEP**

2004-2008 Ford Econoline (Ambulance)

Step 6 - Camera Mounting and wire Routing:

IMPORTANT: Windshield Mounting should only be performed when windshield temperature is within 50°F-100°F (10°C-38°C) to allow proper curing of adhesive

At this point you can now mount the Recorder bracket to the VHB tape applied to the windshield on Step 1

Mount the bracket to the VHB tape and apply pressure for 30 seconds (A)

With the vehicle off, hook the Recorder to the bracket from the top (1), then swing down (2)

2004-2008 Ford Econoline (Ambulance)

To verify proper angle & correct mounting, press the driver activity button. Logon to your Rosco account and view activity to confirm proper angle
